

## Magic Trick

Your teacher assigned you a magic trick. The video has been sent to you. (csdecou.net)  
Watch the video. Watch the tutorial. Gather the material you need. Practice it ... enough to trick us!!!

To present your magic trick,, you have two options:

- 1) Record yourself at home performing the magic trick.  
Keep the video on your drive.
- 2) Present it live on your presentation day.

Your presentation should include:

### **Introduction:**

a) What is your magician name?

*I'm \_\_\_\_\_*

b) What is your magic trick called?

*Today, I will perform a trick called \_\_\_\_\_*

c) What is supposed to happen?

*In this trick, I will be able to. (make something disappear, bend a coin, ...)*

d) Let us know the material you are using :

*To perform this trick, I will use ... (cups, coins, ... )*

Don't tell us the material that helped you performed the trick and would make it obvious for us to know how you did it.

### **The steps:**

Explain the steps. Guide us all the way. Use the present continuous tense Be+ verb+ing  
- I am going)

1) *First, I'm... (use present continuous tense)*

*Now, I'm ...*

2) *Then, I'm going to...*

3) *After, I'm...*

4) *Tada....*

### **REVEAL YOUR TRICK**

Ask your audience if they've discovered how you did it.

*Do you know how I did it?*

If your audience doesn't know...

Share a first clue, let them know ALL of the required material to do it.

Let them think of ways you could have used the material to perform your trick.

If they don't find it, share a second clue: Tell them if you had to prepare something in advance.

As a third clue, watch the video, stop at the turning point (the moment where you are doing the special thing. )

*Tell them: Watch this carefully. This is where it happens. What do you think I did?*

*If they still don't know, tell them. :-)*
